

To the FCC

As a paying customer for xmradio I expect some local news ,reception is not always good enough on regular radio ,on xm you get the traffic news fast every few minutes , the same with the weather, it makes all the difference in the world, to know if your going to take the next exit coming up, or go straight ,instead of sitting in front of the exit for 30 minutes waiting for the traffic news to come up on FM or am radio , the same for weather ,its kind of nice to know in Texas ,how close the tornado is from your path.  
The NAB has no business getting involved in stopping satellite radio from giving safety information . I'm paying for this service , it's a choice that I have ,better signal better service ,better information ,so lets keep the politic out of this ,and not let the NAB influence our rights. Thanks Michel
